Course Content Summary**

Course Prefix and Number: HIM 236

Credits: 5

Course Title: Coding and Reimbursement in Alternate Health Care Settings

Course Description: Focuses on disease and procedure coding using International Classification Disease (ICD) and Current Procedural Terminology (CPT) in alternate health care settings, such as behavioral health, home health, skilled nursing facilities, long-term care hospitals (LTCH), rehab facilities, and hospice. Prerequisite: Admittance into the Advanced Medical Coder Career Studies Certificate. Lecture 5 hours per week.

General Course Purpose: Required for the Advanced Medical Coder Career Studies Certificate, this course is designed to introduce students to the practical application of coding and reimbursement as it applies to alternate health care settings.

Course Prerequisites and Co-requisites:

Prerequisite: Admittance into the Advanced Medical Coder Career Studies Certificate

Student Learning Outcomes:

Upon completing the course, the student will be able to

- a. Discuss the coder's role in alternative health care settings;
- b. Identify and distinguish documentation required for each alternate health care setting;
- c. Demonstrate knowledge of documentation requirements by Medicare, Medicaid, and other regulatory agencies as it applies to each alternate health care setting;
- d. Demonstrate understanding of reimbursement methodologies for alternate health care settings;
- e. Demonstrate general knowledge of Diagnostic and Statistical Manual (DSM), ICD-O, and Systemized Nomenclature of Medicine (SNOMED) classification systems; and
- f. Demonstrate correct application of ICD-10/CPT codes for home health/hospice cases, skilled nursing cases, rehabilitation facilities, and long-term care hospitals.
